Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-16, drawn to a method for reducing the content of metals in ionic form present in aqueous effluents.

Group II, claim(s) 17, drawn to a demonstration kit.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the corresponding special technical feature fails to define a contribution over the prior art (see EP 515686 listed in the search report for the corresponding PCT application). In addition, the corresponding technical feature reads on a nickel powder which is readily commercially available.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species of metals  $M_n$  including from iron, ruthenium, osmium, cobalt, rhodium, iridium, nickel, palladium and platinum;

Art Unit: 1797

Species of metals  $M_i$  including scandium, yttrium, lanthanum, actinium, titanium, zirconium, hafnium, vanadium, niobium, tantalum, chromium, molybdenum, tungsten, manganese, technetium, rhenium, iron, ruthenium, osmium, cobalt, rhodium, iridium, nickel, palladium, platinum, copper, silver, gold, zinc, cadmium, mercury, aluminum, gallium, indium, thallium, silicon, germanium, tin, lead, arsenic, antimony, bismuth, selenium, tellurium, le polonium, iodine, astatine, cerium, praseodymium, neodymium, promethium, samarium, europium, gadolinium, terbium, dysprosium, holmium, erbium, thulium, ytterbium, lutetium, thorium, protactinium, uranium, neptunium, plutonium, americium, curium, berkelium, californium, einsteinium, fermium, mendelevium, nobelium and lawrencium;

Species of aqueous effluent to be processed including groundwater tables, surface water, water distribution networks, industrial water, waster water, slurries, and industrial waste.

Applicant is required, in reply to this action, to elect a single species of metal  $M_h$  and  $M_i$  and species of aqueous effluent to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

Art Unit: 1797

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
